

Aloha Vibes Bar & Grill Replaces Per-Cover Reservation Fees With an Owned System

The oceanfront Kailua-Kona restaurant runs reservations, menus, pickup orders, and live-music scheduling on infrastructure it owns. Built by Internal Automation.

KAILUA-KONA, HI · SEPTEMBER 10, 2026 · Aloha Vibes Bar & Grill, an oceanfront restaurant on Ali'i Drive in Kailua-Kona, has replaced subscription reservation software with a system it owns outright, built by Internal Automation.

The availability engine models the restaurant's actual floor, with 25 reservable seats per slot in 90-minute windows and support for overlapping parties. Each booking generates a staff alert and a guest confirmation simultaneously, timestamped in Hawaii time. 293 reservations have been recorded on the system.

The platform serves 72 food items and 86 drinks as digital menus and supports a pickup ordering flow capturing items, quantities, and collection times. A single administrative interface covers reservations, both menus, opening hours, music, events, and orders.

A scheduling monitor alerts the owner when no future live-music event is booked. A separate automated collector tracks review velocity across seventeen competing Kailua-Kona restaurants.

The restaurant owns the system and pays no per-cover fees.
